

Job Description: Senior Data & AI Consultant

Company: Northbridge Advisory Partners **Location:** Hybrid (3 days in-office) **Department:** Data & AI Advisory

About Northbridge Advisory Partners

Northbridge Advisory Partners is a professional services firm. Within our Data & AI Advisory practice, we build and deploy artificial intelligence solutions for our clients.

About the Role

As a Senior Data & AI Consultant, you will lead engagements to deploy Generative AI solutions. You will work with executives to understand business needs and implement scalable architectures using Azure AI services.

What You Will Do

- Lead client engagements independently.
- Deploy Large Language Models (LLMs) and Generative AI applications into production environments.
- Write code in Python.
- Present to client C-suite stakeholders.

What You Bring

- 5+ years of experience in professional services or technology consulting.
- Deep expertise in Azure AI services and Python.
- Proven experience deploying LLMs or GenAI solutions into production.
- Strong stakeholder management skills, presenting to executive-level audiences.
- Active certification as an Azure Data Engineer or Azure AI Engineer.

Northbridge Advisory Partners offers a competitive compensation package aligned with market benchmarks, including comprehensive benefits.
